Technical Sheet

NO Fleas Bug Bomb

Fast, long term flea control

www.kiwicare.co.nz

NO Fleas Bug Bomb

Benefits and Features

- Contains Insect Growth Regulator (IGR) to break the breeding cycle.
- Controls adult fleas, their larvae and eggs.
- Penetrates hard to reach places.
- Long lasting protection - up to 6 months.
- One NO Fleas Bug Bomb treats area/room up to 50 m²

Directions

- **Coverage:** Work out how many NO Fleas Bug Bomb fumigators are required as follows:
- Multiply floor area of each room - e.g. 3 m x 6 m = 18 m²
- Multiply floor area by height of room - e.g. 18 m² x 2.6 m = 46.8 m³
- Do the above calculations for each room. Add up each room and total, divide total by 75 to show how many NO Fleas Bug Bombs are needed for the whole area to be treated.
- Always round up, e.g. if the total is 200 m³ (200 divided by 75 = 2.7) you should use 3 NO Fleas Bug Bombs, not 2.

Follow can directions carefully.

1. Prepare the area to be treated prior to activation. Remove or cover fish tanks. Remove other animals, fish and birds. Extinguish or turn off ventilation systems, pilot lights and naked flames. Close doors, windows and other ventilation.
1. Set off the NO Fleas Bug Bomb/s and vacate area. Do not re-enter for 3 hours, up to 24 hours.
2. On re-entry open doors and windows to ventilate for 30 mins.
3. For long lasting bug control use in conjunction with Kiwicare NO Fleas Total Protection residual spray.

For Best Results

- Use as part of the Kiwicare [1-2-3 Flea Control Programme](#).
- Watch the short video on [How to Get Rid of Fleas](#).
- See kiwicare.co.nz for more information on bed bug control.

Active Ingredients

NO Fleas Bug Bomb: 10 g/kg Permethrin and 6 g/kg Pyriproxyfen in the form of an aerosol.

Caution

- Flammable aerosol - Do not use near a flame or other source of ignition.
- Do not use a single bomb in a volume (e.g. closet) less than 5 m³.

Available As

200 ml concentrate and 680 ml ready to use trigger spray.

Complementary Products

- [NO Fleas Total Protection Spray](#)
